Washington, D.C. 20231

Sir:

Prior to initial examination on the merits, please amend the above-identified application as follows:

IN THE CLAIMS:

Claim 1. (Amended) Electromagnetic device comprising at least one magnetic circuit [(1)] and at least one electric circuit [(2, 3)] comprising at least one winding [(4, 5)], the magnetic and electric circuits being inductively connected to each other and the device comprising a control arrangement [(7)] to control operation of the device, [characterized in that] wherein the control arrangement [(7)] is adapted to control frequency, amplitude and/or phase as concerns electric power to/from the device by the control arrangement comprising means [(9)] for controlling the magnetic flux in the magnetic circuit, and that said at least one winding [(4, 5)] or at least a part thereof comprises at least one electric conductor [(42)] having an insulation system comprising an electric insulation [(44)] formed by a solid insulation material and interiorly thereof an inner
